DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on June 23, 2008 has been entered.

Acknowledgments

1. Applicant's amendment filed on December 10, 2007 is acknowledged. Accordingly claims 185-189, and 192-203, remain pending and are allowed.
2. Claims 185-189, and 192-203, are allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is Heads I win, tails you lose: Business, finance and science; Business Pg. 74 (herein after "The Economist").

4. Regarding the claimed terms, the Examiner notes that a "general term must be understood in the context in which the inventor presents it." *In re Glaug* F.3d 1335,

1340, 62 USPQ2d 1151, 1154 (Fed. Cir. 2002). Therefore the Examiner must interpret the claimed terms as found on pages 1-36 of the specification. Clearly almost all the general terms in the claims may have multiple meanings. So where a claim term "is susceptible to various meanings, ... the inventor's lexicography must prevail..." *Id.* Using these definitions for the claims, the claimed invention was not reasonably found in the prior art.

5. The primary reference "The Economist" teaches that a small change is a big pain and there is an easy way to establish it.: round the amount of every transactions up or down to the nearest pound (or dollar, or whatever). The Economist further suggested that the key to his idea is a benign form of gambling.

6. The Economist however does not at least teach or suggest a method comprising: calculating any amount that is a difference between a round-up amount and a purchase price, nor would it be obvious to modify the system described in the Economist to provide for such a feature. The Economist also failed to disclose or suggest a method further comprising: printing an entry in a lottery in which a prize for winning the lottery is proportional to the round-up amount and displaying an offer to exchange the round-up amount for an entry in a lottery in which a prize for winning the lottery is' proportional to the round-up amount.

7. Moreover, the missing claimed elements from "The Economist" are not found in a reasonable number of reference(s). Yet even if the missing claimed elements were found in a reasonable number of references, a person of ordinary skill in the art at the time the invention was made would not have been motivated to include these missing

elements in an embodiment in The Economist's disclosure because: such would have changed the basic working principles and the operation of The Economist which is silent on printing an entry in a lottery in which a prize for winning the lottery is proportional to the round-up amount and displaying an offer to exchange the round-up amount for an entry in a lottery in which a prize for winning the lottery is' proportional to the round-up amount.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

9. The prior arts made of record and not relied upon is considered pertinent to applicants disclosure.
